New Andela Opportunity

Dear Talent,

I'm reaching out to determine if you're interested in a new position logged with Andela. I've reviewed your profile, and you seem a good fit for the job.

We have a new amazing job opportunity to work in one of the biggest companies in Africa: **Irembo**

> *Irembo is a technology company in the gov-tech and fin-tech spaces that designs and develops digital products focused on users in Africa, starting with Rwanda. Irembo has five years of experience creating Irembo's pioneer product, the online platform irembo.gov.rw which helps Rwandan citizens and foreigners to access over 100 public services. To date, it has enabled 20M+ transactions and we have ambitions and plans to scale our technology across Africa to enable more governments and enterprises to serve their users better. More information is available on irembo.com. At Irembo, Engineers develop technologies that change the way millions of people interact with digital services. We need our engineers to be versatile, display leadership qualities, and be enthusiastic to take on new problems and push our products forward.*

This is an amazing project with the following characteristics:

- Duration of the project: 6 months (at least)
- Selected talents should work at the Irembo offices in Kigali (Rwanda)
- Candidates outside Rwanda should be able to travel and stay in the country for the duration of the contract.
- Irembo/Andela will be responsible for flights and accommodations
- Selected candidates might start working in Irembo´s Office in Rwanda the first week of July.

If you are interested, please reply to this message and indicate:

- Are you living in Kigali (Rwanda)?
- If your answer was NO, are you interested in moving for 6 months and having a great opportunity to work in Kigali (Rwanda) in Irembo`s office?
- Your expected MONTHLY salary in USD for you to take this role.
- Your earliest starting date, please account for any notice periods.
- Describe your current hardware (Mac/PC, CPU, RAM, SSD)
- Is your profile in Andela's platform fully updated? If not, could you update it, please?

Also, please confirm you are OK with all job details to streamline the process as Andela values the technologist's time and dedication.

Feel free to reach out to us with any questions.

Note: By accepting this request and providing the requested information, you will be added to a shortlist of potential candidates shared with the client. I will contact you by email or message you if the client decides to interview you.

Job Title
DevOps Engineer

We are seeking an experienced DevOps Engineer to join our team. The ideal candidate will have a minimum of 3 years of experience in a tech leadership role and will be responsible for maintaining our database systems, and infrastructure, and ensuring that our web applications are secure.

Responsibilities:

- Maintain our database systems, including PostgreSQL, MySQL, and MS SQL.
- Ensure the security and performance of our databases.
- Work with development teams to optimize database performance and troubleshoot issues.
- Implement source control and continuous delivery tools, including GitHub Actions, Bitbucket, and TeamCity.
- Develop Shell scripts and at least one scripting language.
- Monitor and manage database backups and disaster recovery procedures.

Requirements:

- Minimum 3 years of experience in maintaining database systems (PostgreSQL, MySQL, MS SQL).
- Expertise in *NIX based OS, core networking services and protocols, and web application security best practices.
- Familiarity with source control and continuous delivery tools, including GitHub Actions, Bitbucket, and TeamCity.
- Proven experience in maintaining database systems (PostgreSQL, MySQL, MS SQL).
- Experience in source control and continuous delivery tools, specifically Bitbucket.
- Expertise in shell scripting and at least one scripting language.

If you have a passion for technology, are a natural problem solver, and are able to work collaboratively with a team, we would love to hear from you.
